TURBOGREEN

NUTRIENT STABILIZER

TurboGreen is an all natural product designed to help produce and convert nitrogen, phosphorous, and other nutrients for plants and stabilize nutrient loss in the soil. It contains beneficial soil microbes and is made with activated water technology.

Reduce Your Nitrogen Fertilizer Usage

Using a nitrogen stabilizer allows growers to reduce synthetic inputs on their crops.

Improve Yields and Soil Health

Building soil biology helps to increase organic matter and improve water holding capacity leading to higher yields.

Increase Nutrient Availability

Natural nitrogen conversion and a healthy soil mineralizes nutrients more efficiently making them plant available.

ABOUT TURBOGREEN:

TurboGreen contains a combination of soil microbes including:

Azospirillum brasilense, Bacillus altitudinis, Bacillus amyloliquefaciens, Bacillus licheniformis, Cellulomonas cellasea, Gluconacetobacter, Nitrosomonas communis, Nitrosomonas nitrosa, Pseudomonas fluorescens, Pseudomonas putida, Pseudomonas stutzeri, Rhizobium, Streptomyces albidoflavous
